REVOL VALVE LUBRICANT - CMG

DESCRIPTION:

Revol Valve Lubricant – CMG is a purpose made product designed for Oilfield and Petrochemical applications. Revol Valve Lubricant – CMG has been formulated to provide lubrication even under the severe service conditions encountered in modern valves employed in the Oilfield including Pipelines and Refineries.

Revol Valve Lubricant – CMG is resistant to; Brine, Steam, Condensate many chemicals and most refinery gases. The product contains a high percentage of solid lubricants which provide outstanding load carrying and long term lubrication performance.

APPLICATIONS:

Modern Oilfield and Refinery Valves – To be used in accordance with Valve manufacturers directions.

Alternative Revol products are available for higher temperature Valve Lubrication and for applications requiring a higher level of chemical resistance.

BENEFITS:

Purpose-Made Product

Good Chemical Resistance.

Biodegradable Non-Toxic Product, can be recommended for use in many environmentally sensitive areas.

High Percentage of Solid Lubricant provide outstanding lubrication and component protection

TYPICAL PHYSICAL CHARACTERISTICS:

Appearance	Smooth Adhesive Grease
Colour	Black
NLGI Classification	2
Worked Penetration (ASTM D-217)	265 – 295
Temperature Range	-30°C to +120°C
Drop Point (ASTM D-566)	None – Infusible Product
Thickening Agent	Highly Refined Modified Clay

PACKAGING:

12.5 Kilo Kegs, 50 Kilo Kegs, 180 Kilo Barrels. (Other pack sizes may be available by request).
